

ASSEMBLY INSTRUCTIONS

- A CONNECTORS**
7½ ft Wide = 16 connectors
10 ft Wide = 20 connectors
- B HOOK & LOOP**
Hook pre-attached to frame
Loop sewn onto graphic
- C ADJUSTABLE FEET**

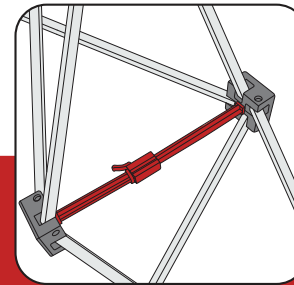

IMPORTANT

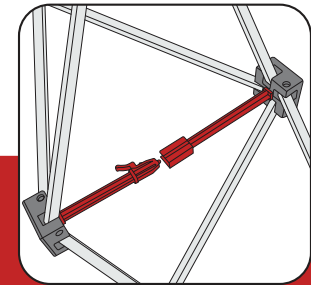

Ensure **ALL** connectors are completely detached before collapsing the frame.

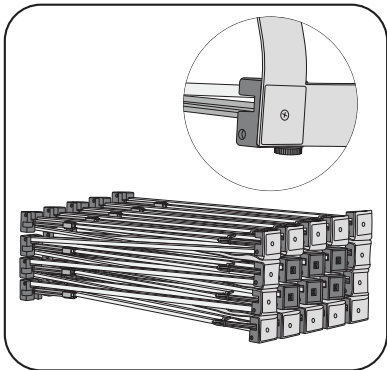

Failure to ensure **ALL** connectors are completely detached before collapsing the frame will result in permanent damage to the frame.

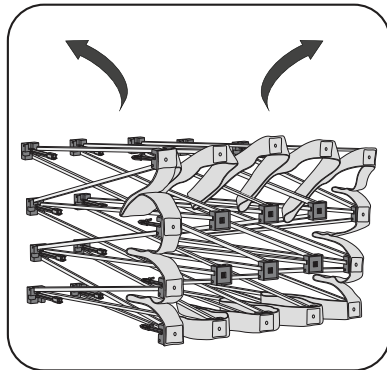

CONNECTED

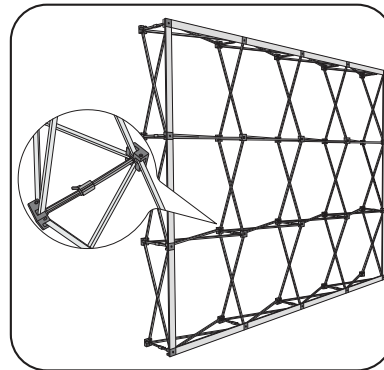

DISCONNECTED

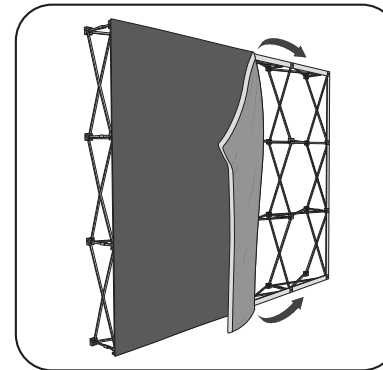

- 1** Remove hardware from carry case. Lay hardware parallel to the floor with the adjustable feet at the bottom.

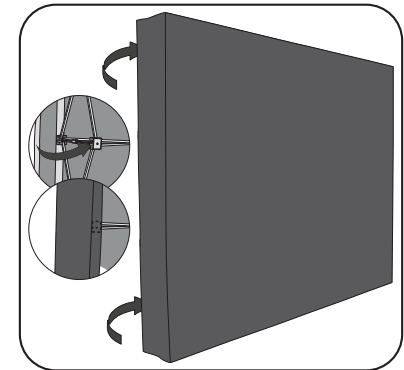

- 2** Grip the aluminum bars and pull apart to open the frame.

- 3** Click together ALL connectors.
 - 7½ ft Wide = 16 connectors
 - 10 ft Wide = 20 connectors

- 4** Starting at one side, attach the graphic. Pull graphic taut as you work your way from one side to the other. Reposition graphic as needed to remove any creases or wrinkles.

- 5** If the graphic has printed end caps: pull the end caps around the side of the frame and secure at the back.
